How to send us electronic scrap by parcel

Instructions for private individuals. You can send electronic components, circuit boards and other electronic scrap via a parcel locker of any carrier — Omniva, DPD, Unisend, Latvijas Pasts or Venipak.

1. Prepare the contents

1. Sort the electronic components by type and put each type in a separate small bag or container. This helps us process your parcel faster.
2. Put everything into one cardboard box.
3. Seal the box securely with packing tape or wrap it in plastic film.

2. Register the shipment

1. Go to the self-service website or app of your chosen carrier. Select the parcel size and the destination country — Latvia.
2. Enter the recipient details (see below) and the parcel locker you will send from. Complete the registration.
3. Print the shipping label and attach it to the box. No printer? Write the shipment code on the box. You will find it on the order confirmation page and in the carrier's email; it has at least 6 characters (letters and numbers).

3. Drop off the parcel

1. Take the parcel to the parcel locker you selected during registration.
2. Open the compartment with the code from the email or SMS, place the parcel inside and close the door.

Recipient

SIA Electronia
Daugavgrīvas iela 116, Rīga, LV-1055
Тел.: +371 25004388
E-mail: info@electronia.lv

We pay for shipping
